Subject: Methodology

Senior Loans - income producing real estate

- if we have money terms, calculate $ px based on BofA assumed market spreads
- if we do not have money terms, value based on an absolute dollar pxs as below;
  - grade 1; good quality, lower leverage, performing well 90.00
  - grade 2; higher leverage, still covers, weaker structures (i.e. extensive IO, big cash outs) 80.00
  - grade 3; excessive leverage, does not cover, non-stabilized, future cash flows 70.00

Additional 10.00 subtractor on all of the above for all loans < $5mm (i.e. grade 1=80, grade 2=70, grade 3=60)

Loans - Land /land development -

all based on absolute dollar pxs

- Entitled/developed (lots) - 60.00
- Entitled/undeveloped - 40.00
- Unentitled - 30.00

Loans - Condos

all based on absolute dollar pxs

- FL, AZ, NV, Mid-West, CA - 50.00
- All other regions - 65.00

Mezz/B-notes

For assets that have been reviewed, dollar pxs calculated based on BofA market coupon

Regular mezz (Lehman LTV<80%) 15%

Mezz but quasi-equity (Lehman LTV >80%) 25%

For assets that have not been reviewed absolute $px of 50.00

Equity

Spot pricing based on market cap rates, comp rentals, $/psf, sales comps

For equity that has not been reviewed absolute $px of 25.00

Securities
Americas - TBD
Europe -$pxs calced based on market spreads Asia - TBD
