The legal landscape around DEI is shifting rapidly — and the False Claims Act is emerging as a key enforcement tool that is likely to affect higher education institutions.

Recent statements from senior Administration officials, combined with a sweeping new government-wide certification proposal, have significantly elevated FCA risks tied to DEI-related policies, procedures, and practices.

## In this webinar, our panel will:

- Identify the principal FCA risk areas higher education institutions face today
- Share practical strategies to mitigate exposure
- Walk through what managing a DEI-focused FCA investigation looks like in practice
