

“Environmental, Health, and Safety Issues Facing the Cannabis Industry,” Jenner & Block

Event

April 8, 2021

On May 4, Partner Steven M. Siros and Associate Leah M. Song will present a CLE webinar on environmental, health, and safety (EHS) issues facing the cannabis industry. The market value of the cannabis industry in the United States is expected to reach \$30 billion by 2025. Currently, 36 states allow the use of cannabis for medicinal purposes and 15 states allow the recreational use of cannabis. To sustain this rapid industry growth, and avoid potential penalties and lawsuits, it is crucial that cannabis companies ensure consistent compliance with EHS rules and regulations. In this CLE Program, Mr. Siros and Ms. Song will cover the particular EHS challenges that the cannabis industry currently faces, including issues related to emissions, water resources, waste regulation, and pesticides. The program will also address worker safety issues and the state and federal OSHA regulations cannabis operations are subject to as well as post-consumer issues cannabis companies face such as packaging issues and recycling. Please email dl_webinar@jenner.com if you are interested in attending. Space is limited. Mr. Siros is chair of the Environmental Litigation Practice and co-chair of the Environmental and Workplace Health & Safety Law Practice. He focuses primarily on environmental and toxic tort matters. Ms. Song is an associate in the firm's Environmental and Workplace Health & Safety Law Practice.
