

"Patent Policy To Watch In 2022," Law360

News

January 3, 2022

Jenner & Block Partner Amr O. Aly spoke with *Law360* about what to expect in US Patent Policy in 2022. In the article, he discusses the future of discretionary denials and best practices to implement in the interim. "You should be ready to file the IPR as soon as possible," said Mr. Aly. "That way you're not close to having a looming district court trial, which would open you up for a discretionary denial of the IPR. It's one of the practicalities of dealing with the existing policies."

Mr. Aly is co-chair of the firm's Patent Litigation and Counseling Practice. He focuses on patent litigation in the telecom, networking, data encryption and security, internet, biotechnology, banking, chemical, and pharmaceutical industries.
