

“Methane: Accounting Using Science-Based Standards,” Renewable Natural Gas Coalition Mid-Year Policy Forum

Event

May 10, 2022

Jenner & Block Special Counsel Tatjana Vujic will lead a “fireside chat” about adjusting the global warming potential of methane to a 24-year time horizon. The conversation is part of the Renewable Natural Gas Coalition’s Mid-Year Policy Forum. Ms. Vujic serves on the Coalition’s Education and Research Advisory Board, which she chaired in 2021. In addition to her private practice, which focuses on issues related to climate and the energy transition, she serves as an Adjunct Assistant Professor of the Practice, in the Environmental Sciences and Policy Division of Duke University’s Nicholas School of the Environment.
