

“Deepfakes and Hallucinations: AI, Evidence, and the Law with Professor Maura R. Grossman,” *Trial Tested*

Podcasts

August 21, 2024

In early 2023, the world was dazzled, amazed — and perhaps a bit terrified — by the introduction of ChatGPT, a new generative artificial intelligence tool. It shook, for many, the understanding of what technology is capable of. In a recent episode of the *Trial Tested* podcast, Partner Terri Mascherin and Professor Maura R. Grossman discuss generative artificial intelligence and its impact on trial law.

Together, they explore why this rapidly evolving technology can't be ignored, how to understand its usefulness and how to prevent misuse and “deepfake defense” in the courtroom.

Terri is a Fellow of the prestigious American College of Trial Lawyers, which sponsors *Trial Tested* to present discussions about life and law.
