

Jenner & Block Lawyers Author Copyright Analysis in Lexology's *Panoramic: Copyright 2025*

Publications

May 30, 2025

Partners Steve Englund, Andrew J. Thomas, and Lauren M. Greene authored the US analysis and introductory Global Overview in Lexology's *Panoramic: Copyright 2025*. The authors discussed the evolution of the copyright legal landscape in response to technological advances.

Among other things, they examined global implications of artificial intelligence (AI) on copyright law, including the extent to which national legislation recognizes copyright protection for works generated in whole or in part by AI. Additionally, they discussed how the United States and countries around the world are grappling with whether generative AI systems can be "trained" on copyrighted works without obtaining the copyright owner's consent.
